END-TO-END AGRI FLOORING SOLUTIONS, BACKED BY EXPERIENCE

Since 2002, RubberGem has been helping farmers create safer, more productive environments for their livestock. What started as a breakthrough in dairy flooring has now evolved into RubberGem Agri, a dedicated division providing expert guidance, tailored solutions, and hands-on support to farms across the globe.

We're not just a product supplier. We're a partner in your operation.

From the first conversation to installation guidance and after-sales support, we offer an end-to-end service built around what matters most: your animals, your conditions, and your peace of mind.

Whether you're upgrading a milking shed, fitting out equine facilities, or designing flooring for a high-traffic feedlot, we're here to help you make the right call.

“ Since we installed RubberGem Agri flooring, we've seen fewer lame cows, better footing, and more settled animals. It's made a real difference. **”**

COMFORT THAT DELIVERS RESULTS

Livestock comfort is more than a welfare box to tick. It's directly tied to productivity, performance, and profit. Whether you're managing a dairy herd or equine facility, what's underfoot plays a critical role in animal health, behaviour, and long-term outcomes.

The right flooring reduces slips, fatigue, and hoof injuries. It supports better joint health and encourages calm, confident movement. When animals are more comfortable, they're easier to manage, more productive, and less prone to illness or injury.

RubberGem Agri flooring is designed with this in mind, helping to create safer, more supportive environments that lead to improved milk yields, better reproductive performance, and healthier herds overall.

TURN COMFORT INTO PERFORMANCE

MADE FOR AGRI TOUGHNESS

DairyGrip is built to handle the daily pressures of farm life. The flooring is crafted from high-quality recycled rubber and feature an integral steel mesh for added strength and stability. Each solution is designed to deliver comfort underfoot and stand up to heavy use.

DairyGrip is ideal for high-traffic dairy environments, offering excellent traction, hygiene, and impact absorption.

It is available in a range of widths, thicknesses, and roll lengths to suit your specific operation. Easy to clean and built to last, the RubberGem Agri range helps reduce wear and tear on livestock and equipment while improving overall safety and efficiency.

“ Since we put the rubber down, we’ve seen fewer lame cows and no serious slips. Four years later, the flooring is still going strong. ”

AUSTRALIAN DAIRY FARMER

TURN COMFORT INTO PERFORMANCE

END-TO-END SERVICE THAT WORKS FOR YOU

Every farm is different, and so is every solution we deliver. Our process is designed to make things simple, practical, and tailored to your operation.

OUR 4-STEP PROCESS

1. CONSULT

We take the time to understand your farm layout, livestock needs, and challenges. This allows us to guide you toward the right flooring solution from the start.

2. RECOMMEND

Based on your needs, we suggest the most suitable product, roll length, and thickness to match your space, stock, and environment.

3. SUPPLY

Your flooring is custom cut and delivered ready for installation. No unnecessary steps. No delays.

4. SUPPORT

We check in post-delivery and are available for ongoing guidance or assistance. If something goes wrong, we're ready to help.

DAIRYGRIP LONG ROLL

VERSATILE BY DESIGN

RubberGem Agri flooring is engineered to perform wherever animals walk, work, or rest. From dairy sheds and feedpads to stables and yards, these solutions are trusted across a wide range of agricultural environments.

Each product is made to handle real-world conditions. Hard wear, heavy equipment, and high traffic are no problem. The result is a safer, cleaner, and more comfortable surface that supports both livestock and workers across the farm.

Across sectors and across continents, RubberGem Agri is helping transform how flooring works in agriculture, setting a new standard for comfort, control, and confidence underfoot.

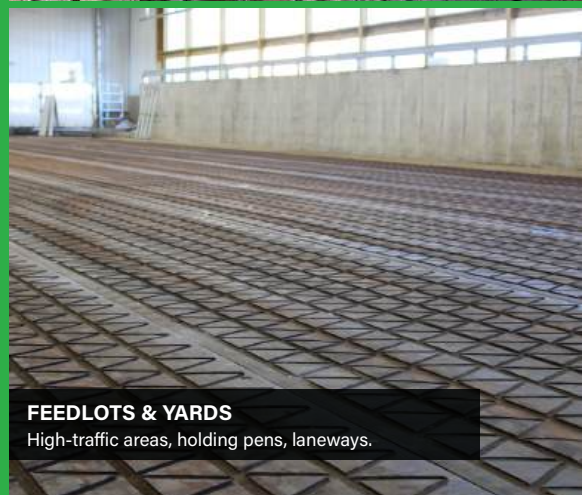

DAIRY ENVIRONMENTS

Milking sheds, feedpads, rotary platforms, walkways.

CUSTOM FIT-OUTS

Calf sheds, vet zones, trailers, horse floats.

FEEDLOTS & YARDS

High-traffic areas, holding pens, laneways.

COMING SOON

EQUINE FACILITIES

Stables, wash bays, tie-up areas, foaling zones.

RUBBER FLOORING MATS

Made from 100% recycled premium rubber, Mats are available in three tread variations: ComfortGrip, DiamondGrip and SuperGrip.

UNMATCHED DURABILITY & COMFORT

Rubber Mats are engineered specifically for the demanding environments of dairy, beef, and equestrian operations. Crafted from high quality rubber, these mats offer exceptional durability, comfort and safety, serving as an ideal solution for a variety of livestock and equine flooring needs.

APPLICATIONS

Dairy Farms

Beef Operations

Equestrian Facilities

RUBBER MATS

ComfortGrip features a finer 'pebble' pattern tread to ensure maximum comfort for your animals in most common applications.

DiamondGrip features a heavier tread pattern for added traction in slippery or inclined areas.

SuperGrip is the ultimate solution for animal safety and wellbeing, featuring a heavy tread pattern for slopes and high-slip areas.

SUSTAINABLE BY NATURE. TRUSTED BY FARMERS.

RubberGem Agri products are made using 100% recycled rubber from tyres and conveyor belts reclaimed from Australia's mining industry. By diverting high-quality industrial rubber from landfill and reconditioning it into long-roll flooring, we give waste a second life and create lasting value for farms around the world.

Every roll is manufactured locally, reducing transport emissions and supporting Australian industry. Steel mesh reinforcement extends the lifespan of each product, helping reduce replacement cycles and further lowering environmental impact.

RUBBER FLOORING MATS

UNMATCHED DURABILITY & COMFORT

Our range of Rubber Mats are purpose-built for high-demand **Cattle** and **Equine** applications - serving as an ideal solution for a variety of agricultural flooring needs.

Made in Australia from 100% Recycled Premium Rubber

**BOVINE
& CATTLE**

- **Built to Last:** Designed specifically for dairy and cattle environments through extensive research.
- **Lower the Risk of Lameness and Increase Productivity:** Reduce stress on your animals' legs and joints.
- **High Traffic Safety a Priority:** The slip-resistant surface creates safer conditions in high-traffic areas such as milking parlours and feeding zones.
- **Hygiene Made Easier:** Our products promote cleaner, drier environments that support better hoof health and hygiene.

EQUINE

- **Training, Stabling and Transport:** Safe, supportive surface for horses.
- **Fall and Slip Hazards Reduced:** By minimising slip and fall hazards, our mats protect both animals and handlers while promoting confidence in movement.
- **Reduce Strain and Joint Injuries:** The cushioned tread reduces strain on joints and hooves, supporting long-term health and performance.
- **Easy to Clean and Maintain:** providing a practical flooring solution for arenas, stables, and wash bays where safety and comfort are essential.

Why Choose RubberGem Agri Products?

Australian Made, Sourced and Owned	Proudly sourced and manufactured in Western Australia. We are hands on in our quality control operations processes.
Premium Vulcanised Rubber	Cushioned design absorbs impact, reducing fatigue and keeping cattle comfortable and healthy.
Safety First	Slip-resistant surface lowers the risk of accidents, protecting both livestock and handlers in busy dairy environments.
Easy to Maintain	Designed for quick cleaning to support a hygienic environment and reduce the risk of disease.
Built to Last	Manufactured from high-quality vulcanised rubber, engineered to withstand the demands of farm life.
Eco-Conscious Choice	Made from 100% recycled vulcanised rubber, supporting sustainable farming practices.
Return on Investment	Improves animal health, saves cleaning time, and boosts productivity for long-term profitability.
